Volume 20 - 2020 Number 2

Congratulations to the Boston Children's 2020 HMS Excellence in Mentoring Award Recipients

William Silen Lifetime Achievement in Mentoring Award

Alan M. Leichtner, MD, MSHPEd, Professor of Pediatrics and Chief Education Officer and Director of the Department of Education

A. Clifford Barger Excellence in Mentoring Award

Richard G. Bachur, MD, Michael W. Shannon, MD, Professor of Pediatrics in the Field of Emergency Medicine, Chief, Division of Emergency Medicine

Drs. Leichtner and Bachur shared their views on how to develop effective mentoring relationships with *Perspectives*. To develop mentoring relationships with trainees, Dr. Bachur recommends discussing both longterm goals and setting clear guidelines; “the common features are a shared vision for the relationship and crystal clear expectations from both sides. When working with trainees and junior staff, I often use a timeline and process map to help organize our thinking and meetings; the timeline becomes the anchor for progress, reassessment of goals, and anticipating next steps.” In addition, Dr. Bachur advises that trainees consider what they would most value in selecting their mentors. “The process of identifying the mentor begins with an understanding of exactly what they are looking for—career mentor, research mentor, or a faculty advocate.”

Dr. Leichtner encourages mentors to identify their trainees' needs, to match their expectations for the future, and to be focused on the relationship; “as a mentor, I have found that two elements are particularly important in developing a strong mentoring relationship. The first is alignment. It is critical to make sure that what your mentee wants to achieve is also what you want for them. The second is provide your total concentration to the needs of your mentee when the two of you are meeting.” Above all, Dr. Leichtner suggests listening carefully during these sessions. “I think the best mentors are good listeners and don't just tell their mentees what to do. Instead, the good mentor helps mentees realize their options and then helps them choose the best one for them.”

Richard Bachur, MD

Alan Leichtner, MD, MSHPEd

S. Jean Emans, MD, Honored with HMS Diversity Lifetime Achievement Award

The Office of Faculty Development is pleased to announce that Dr. S. Jean Emans, OFD Director, was honored with the 2020 Diversity Lifetime Achievement Award from the HMS Office for Diversity and Community Partnership on June 9, 2020 at a special virtual ceremony. She is the fifth faculty member (first woman) since 2001 to receive this honor. In 1968, while a second year student at Harvard Medical School (and one of 12 women in the class of 1970), Dr. Emans joined with other HMS students (including her husband, Dr. John Emans) to petition Dean Ebert to recruit substantially more Black students to the next class, and to improve the health of black residents in the neighboring communities. Amazingly, HMS increased the acceptance of black students from 1-2/year to 15 for the next class of 1973! Dr. Emans has continued to advocate for diversity throughout her career, including recruitment of women and minority trainees and faculty, advocating for research pertaining to health disparities as well as LGBTQ issues, and creating mentoring programs. She has been a highly effective career advisor and mentor for many women physicians and scientists. In her acceptance speech at the ceremony, she noted that “I have had the good fortune to be at Children's and HMS and to create an Interdisciplinary Adolescent Health training program and the Office of Faculty Development. I speak with great pride that Children's 3 years ago launched an Office of Health Equity and Inclusion with Dr. Valerie Ward, a radiologist, as the Medical Director. Through all of these programs, I have been fortunate to be able to mentor many diverse fellows and faculty at Children's and nationally.”

Dr. Emans with her HMS Diversity Lifetime Achievement Award at the June 9 Virtual Ceremony

Save the Date: September 23 is the date for the 3rd Annual Boston Children's Pediatric Health Equity and Inclusion Symposium: see details on back cover!

Tina Young Poussaint, MD, FACR, Named Lionel W. Young Chair in Radiology

Congratulations to Tina Young Poussaint, MD, FACR, Professor of Radiology (HMS) who has been named the inaugural Lionel W. Young Chair in Radiology at Boston Children’s Hospital; the chair honors the legacy of Dr. Poussaint’s father, Dr. Lionel W. Young, who was a Professor of Radiology, Chief of Pediatric Radiology at Loma Linda University School of Medicine and past-President of the Society for Pediatric Radiology. Dr. Poussaint is also the current President-Elect & Program Chair for the American Society of Neuroradiology.

Also see Dr. Poussaint’s biographical profile in the Archives column on p. 4!

Tina Young Poussaint, MD, FACR

Steven Fishman, MD, Appointed Surgeon-in-Chief

Steven Fishman, MD, Chief of the Department of Surgery at BCH, HMS Professor of Surgery, and the Stuart and Jane Weitzman Family Chair in Surgery, has been appointed BCH’s Surgeon-in-Chief, succeeding James Kasser, MD, who served for 10 years as Surgeon-in-Chief. Dr. Fishman has extensive administrative and leadership experience; he has served as President of the Physicians’ Organization and as Senior Vice President for Access and Business Services. In these roles and through other committees, such as the Children’s Enterprise Contracting Committee and the Executive Committee, he has improved coordination amongst BCH Foundations and increased the efficiency of patient access. Dr. Fishman’s research focuses on vascular tumors and his leadership extends to serving as President of the International Society for the Study of Vascular Anomalies.

Steven Fishman, MD

Joseph Cravero, MD, Appointed Chief of the Department of Anesthesiology, Critical Care and Pain Medicine

Congratulations to Joseph Cravero, MD, HMS Professor of Anesthesiology, who has been appointed Chief of the BCH Department of Anesthesiology, Critical Care and Pain Medicine, succeeding Dr. Paul Hickey, who led the Department for 30 years. Dr. Cravero joined the Department of Anesthesiology, Critical Care and Pain Medicine from Dartmouth’s Geisel School of Medicine in 2012 and assumed leadership roles as the Director of Perioperative Outcomes Research, the Director of Sedation Services, and the Director of Radiology Anesthesia Services. In addition, Dr. Cravero has contributed to the Boston Children’s mission in medical education and has been honored twice as the Department of Anesthesiology’s Resident Teacher of the Year. His research focuses on post-surgical outcomes and anesthesia techniques.

Joseph Cravero, MD

Director’s Perspectives, by S. Jean Emans, MD

Although the past 6 months have been challenging for all of us, I have been impressed by the volunteerism and hard work of our entire community. We have developed new paradigms to address COVID-19, clearly a work in progress, and united in our antiracism efforts. I have always been proud to be affiliated with Boston Children’s Hospital – and that pride has only multiplied since the early spring. This current issue highlights ongoing initiatives in social justice, inclusion, and health equity, spearheaded by Dr. Valerie Ward and her team in the Office of Health Equity and Inclusion, as well as faculty achievements in mentoring and professional leadership. I congratulate Dr. Tina Young Poussaint in being named the inaugural Lionel W. Young Chair in Radiology (see announcement on p. 2) and Dr. Jane Newburger in receiving the 2020 HMS/HSDM Joseph B. Martin Dean’s Leadership Award for the Advancement of Women (p. 5). Boston Children’s becomes stronger through our mentoring practices so please congratulate Dr. Richard Bachur, recipient of the HMS A. Clifford Barger Excellence in Mentoring Award, and Dr. Alan Leichtner, recipient of the HMS Lifetime Achievement in Mentoring Award, and read their tips. Let’s look forward to a bright and rewarding fall!

News from the Office of Health Equity and Inclusion

Events:

Health care disparities related to the COVID-19 pandemic and recent national events related to systemic racism have created a need for dialogue across the hospital. The Office of Health Equity and Inclusion and the Equity, Diversity and Inclusion (EDI) Council have begun hosting virtual “Reflection Rounds” as a safe space for all employees to share thoughts and reactions. Reflection Rounds have also been held on the Department/Division-level and within Human Resources upon request.

On June 22, 2020, the Office of Health Equity and Inclusion held a virtual Faculty Discussion Group with faculty from backgrounds that are underrepresented in medicine (URiM). **Faye Holder-Niles MD, MPH**, Director, Primary Care Asthma Programs and Medical Director of Community Primary Care, Office of Community Health co-facilitated the session with **Valerie L. Ward, MD, MPH**, Medical Director, Office of Health Equity and Inclusion. Anyone interested in joining the URiM Faculty Discussion Group can email healthequity@childrens.harvard.edu for additional information.

At the Boston Children’s Hospital-wide Open Meetings on June 4 and June 11, 2020, **Valerie L. Ward, MD, MPH** was invited to speak about the actionable and intentional steps that Boston Children’s Hospital is taking related to equity, diversity and inclusion initiatives specifically within the setting of widened health care disparities related to the COVID-19 pandemic combined with the recent national events.

The Annual LGBTQ Pride Celebration took place virtually on June 12, 2020. The presentation included 16 guest speakers from the Boston Children’s community discussing the importance of LGBTQ rights and equity. Speakers included: **Jim Smith, Sandra Fenwick, MPH; Col Williams, PsyD; Katharine Thomson, PhD; Allison Scobie-Carroll, LICSW, MBA; Sabra L. Katz-Wise, PhD; Valerie L. Ward, MD, MPH; Michael Gillespie, MPH; Frances Grimstad, MD, MS; Todd Katzman, CPA, MHA, CMPE; Elizabeth Boskey, PhD, MPH, LICSW; Julian Post; Steve Coldwell; Dick Argys, MA; Rabbi Susan Harris, MHL, BCC; and a patient.**

Awards and Recognition:

The Office of Health Equity and Inclusion, Office of Faculty Development and Medical Staff Organization are pleased to announce the 2020-2021 awardee of the MSO Pediatric Health Equity Grant, **Caitlin K. Rollins, MD, SM**, for her research project, “Socioeconomic Status and Fetal Brain Development in Congenital Heart Disease.” Dr. Rollins is an Attending Neurologist in the Department of Neurology at Boston Children’s Hospital and an Assistant Professor of Neurology at Harvard Medical School. Her research study aims to determine the association between individual- and neighborhood-level socioeconomic status and fetal brain structure in congenital heart disease.

Caitlin Rollins, MD, SM

We would like to congratulate **Marcella Luercio, MD**, Instructor in Pediatrics in the Division of General Pediatrics, for receiving the Rabkin Fellowship in Medical Education at Beth Israel Deaconess Medical Center for the 2020-2021 academic year, where she will combine her interests in diversity, equity and inclusion work and medical education. Her fellowship project is aimed at determining the role of implicit bias in the clinical evaluation of physician trainees. **Valerie L. Ward, MD, MPH**, is a Fellowship Mentor for Dr. Luercio.

Marcella Luercio, MD

Welcoming Office of Health Equity and Inclusion New Staff Member: Patrice Melvin, MPH

We are excited to announce the addition of **Patrice Melvin, MPH**, to the Office of Health Equity and Inclusion as of June 2020. Patrice is a Senior Biostatistician for the Center for Applied Pediatric Quality Analytics and a Senior Data Analyst for the Office of Health Equity and Inclusion. She will assist with conducting data-driven pediatric health care disparities research and the development of pediatric metrics to identify and monitor disparities.

Patrice Melvin, MPH

Update from the BCH Medical Library By Chloe Rotman, MLIS, Manager of Library Services

Though the physical library in the Longwood Center remains closed, the librarians are hard at work remotely. All of our services remain available, including literature collections, consultations on systematic review methodologies, and group and one-on-one trainings in databases, searching skills, and citation tools.

The Medical Library has created a "[virtual book display](#)" of [anti-racism literature](#), with input from the Office of Health Equity and Inclusion. As the hospital continues to engage in critical conversations about race and equity, it is our hope that this list can serve as a centralized starting point for staff and faculty book groups and personal reference. Because the Medical Library cannot currently loan out books, the "virtual book display" contains links to purchase copies and to local public library systems. Library staff are also available for conversations about moderating book discussions around difficult topics.

Here's what the librarians and archivists are currently reading:

Chloe – *Eden Mine* by SM Hulse

Anna – *The Immortal Life of Henrietta Lacks* by Rebecca Skloot

Alex – *The Vanishing Half* by Brit Bennett

Alina – *Medical Bondage: Race, Gender and the Origins of American Gynecology* by Dierdre Cooper Owens

Katie – *Parable of the Sower* by Octavia Butler

1944 medical staff, with Dr. Lillian A. Francis McMackin (fourth from left, front row)

News from the BCH Archives By Alina Morris, MLIS

Last year the Office of Health Equity and Inclusion began to explore Boston Children's Hospital archival collections to research the individuals that paved the way for a more diverse and inclusive workforce at Boston Children's Hospital. Below we highlight a few of these notable pioneers.

In July 1942, the first women interns and residents were appointed at Boston Children's Hospital. The annual report noted the appointment of women was "granted by the board of managers as a wartime measure," but "hoped to become permanent policy." In this medical staff photo from 1944, Dr. Lillian A. Francis McMackin (fourth from left, front row) became the first woman intern and then staff as an assistant physician, and Dr. Gretchen Hutchins Moll (third from right, front row) was the first woman resident. However, it wasn't until the feminist movement in the U.S. and passing of Title IX of the Higher Education Amendment in 1972 that the admission of women to medical schools began to grow, to 28% in 1979 and 42% by 1994.

Michael W. Shannon, MD, MPH, FAAP trained in pediatrics at Boston City Hospital and Boston Children's and received his fellowship training in general pediatrics, clinical pharmacology and toxicology and pediatric emergency medicine at Boston Children's. He rose rapidly through the academic ranks becoming the first African American full professor of pediatrics in Harvard Medical School's history. He was Associate Chief of the Division of Emergency Medicine at Boston Children's before assuming leadership of the Division from 2003 to 2007, becoming Boston Children's first African American division chief. Dr. Shannon died on March 10, 2009 at the young age of 55 years.

In 2011, Tina Young Poussaint, MD, FACR became the first female African American full professor at Boston Children's, as Professor of Radiology at Harvard Medical School. She is the third African-American woman to achieve this rank at HMS. Dr. Poussaint is Director of Neuro-oncologic Imaging in the Boston Children's Department of Radiology and principal investigator and director of the Neuroimaging Center of the NIH-funded Pediatric Brain Tumor Consortium. She was recently appointed the inaugural incumbent of the Lionel W. Young Chair in Radiology at Boston Children's (see article on p.2).

In order to continue to change the cultural landscape at Boston Children's, the Office of Health Equity and Inclusion and the Equity, Diversity and Inclusion (EDI) Council are hosting Reflection Rounds to identify actionable steps that Boston Children's Hospital can take to promote workforce diversity and address combinations of health disparities related to the COVID-19 pandemic and public health inequities caused by systemic racism. The Archive Program is also working in conjunction with the Office of Health Equity and Inclusion to develop a diversity timeline of Boston Children's Hospital in 2021.

Michael Shannon, MD, MPH, FAAP; 1953 – 2009; Chief of the Division of Emergency Medicine, 2003 - 2009

Jane Newburger, MD, MPH, Receives HMS/HSDM Joseph B. Martin Dean's Leadership Award for the Advancement of Women

Congratulations to Jane Newburger, MD, MPH, Commonwealth Professor of Pediatrics in the BCH Department of Cardiology, who has been honored with the 2020 HMS/HSDM Joseph B. Martin Dean's Leadership Award for the Advancement of Women for her advocacy on behalf of women physicians and scientists. Dr. Newburger addressed the HMS/HSDM Joint Committee on the Status of Women regarding the importance of mentoring in women's careers and emphasized that effective mentors can help women select good projects, lessen the burdens of perfectionism, and focus on work by getting assistance at home.

Jane Newburger, MD, MPH

Judy Lieberman, MD, PhD, Appointed to the National Academy of Sciences

Congratulations to Judy Lieberman, MD, PhD, HMS Professor of Pediatrics in the BCH Program in Cellular and Molecular Medicine, who has been appointed to the National Academy of Sciences (NAS). The NAS was founded in 1863 and advises the federal government on scientific policy. Members are elected by their peers. Dr. Lieberman was also inducted into the American Academy of Arts and Sciences in 2008. Her research focuses on immunity cells that act as resistance to infection and cancer.

Judy Lieberman, MD, PhD

Making Science in Fiber Arts Virtual Meeting

An Invitation from Group Leader, Elissa Weitzman, ScD:
Wednesday, September 16, 1 – 2 PM, via Zoom

Last year I started a fiber arts group at Boston Children's – spurred by a goal of making connections around "making" – and the opportunity to find inspiration for science and medicine in those times when the brain wanders and the fingers focus. Making and keeping connections is extra dear during these COVID days. If you are a knitter, crocheter or fiber arts "maker" (novice or advanced), your peers will be sitting, making, talking science and life on September 16, 1-2 PM. We'd love to see you and your project there – this is an open group and attendance last year or any time is not required to join.

Work/Family Peer Support Groups for BCH Faculty with Dr. Sara Forman

Faculty Peer Support Virtual Introductory Meeting
Friday, September 11, 12 – 1 PM, via Zoom

Attend this introductory session to learn about the OFD sponsored faculty peer support groups and to chat with current participants. The peer support groups offer a comfortable environment to discuss challenges and solutions in areas of career, family, and personal development.

Apple-Picking Expedition at Westward Orchards

Sunday, September 13, 1 - 4 PM, Westward Orchards in Harvard, MA
178 Mass Ave., Harvard, Massachusetts

Host: Dr. Alicia Casey

Come spend a few hours apple-picking with colleagues and families in the Orchards and enjoy toddler/kid-antics, fresh air, and a countryside setting. We will meet in the picnic area on the lawn at 1:00 PM – just walk past the Orchard Store and look for the canopy. For safe apple-picking, the Orchard requires face masks for all participants and social distancing between groups. Hand-washing stations will be available throughout the Orchards. Please email ofd@childrens.harvard.edu with approximate number of adults and kids. There is no admission fee. The Office of Faculty Development will provide water; each family is responsible for other refreshments and apple purchases. Westward has a lunch menu from 11am to 3pm, with porch space and picnic tables available. Directions: Click on the "Get Directions" link: <https://www.westwardorchards.com/our-farm-store/>

Congratulations to the 2020 OFD/BTREC/CTREC Fellowship Recipients!

Banu Ahtam, DPhil; Instructor in Pediatrics, Newborn Medicine - Fetal-Neonatal Neuroimaging & Developmental Science Center (FNNDSC); How seizure activity affects brain connectivity in the immature brain

Andrea Bauer, MD; Assistant Professor of Orthopedic Surgery; Growing Up with a Plexus Injury

Alex Cuenca, MD, PhD; Assistant Professor of Surgery; The role of group 2 innate lymphoid cells (ILC2) in allograft tolerance

Ryan Fame, PhD; Instructor in Pathology; Interaction between metabolism and ion transport in the CSF niche

Dongwon Lee, PhD; Instructor in Pediatrics, Nephrology; Cell-type-specific cis-regulatory element maps for kidney genomic discovery

Hojun Li, MD, PhD; Instructor in Pediatrics, Hematology-Oncology, Mechanistic underpinnings of progenitor cell proliferative potential

Sarah Morton, MD; Instructor in Pediatrics, Newborn Medicine; Computational Prioritization of Coding and Non-Coding Variants in Congenital Heart Disease

Amy O'Connell, MD, PhD; Instructor in Pediatrics, Newborn Medicine; The Role of Wnt2b in Intestinal Hypoxic Injury

Yifeng Peng, PhD; Instructor in Pediatrics, Cardiology; Real-time Non-Invasive Monitoring of Intravascular and Intracardiac Pressure using Caged Microbubbles as Novel Ultrasound Acoustic Reporters

David Shulman, MD; Instructor in Pediatrics, DFCI Pediatric Oncology; Evaluation of targeted therapy and precision biomarkers in patients with Ewing sarcoma

Margaret Stefater, MD, PhD; Instructor in Pediatrics, Endocrinology; Role of Intestinal Luminal and Epigenetic Factors to Mediate Intestinal Metabolic Remodeling After Gastric Bypass Surgery

Mary Whitman, MD, PhD; Assistant Professor of Ophthalmology; Early synaptic signaling in development of eye movement circuitry

Kee Kiat Yeo, MD; Instructor in Pediatrics, DFCI Pediatric Oncology; Genomic Landscape, Clinicopathological Feature and Outcome of Adolescent and Young Adult (AYA) Central Nervous System (CNS) Tumors

The Office of Faculty Development Invites You to a Special Virtual Celebration To Honor the Recipients of the 2020 Boston Children's Hospital Fellowships, Research, Medical Education, and Program Awards

Friday, October 30, 12 –1:00 PM, via Zoom (link distributed in October)

Awards Ceremony sponsored by:

Sandra Fenwick, MPH, CEO; Kevin Churchwell, MD, President and COO; David Williams, MD, Chief Scientific Officer; Jean Emans, MD, OFD Director; and Alan Leichtner, MD, MSHPEd, Chief Medical Education Officer

Project Updates from 2 OFD/BTREC/CTREC Faculty Career Development Fellowship recipients

RSVP to ofd@childrens.harvard.edu
Colleagues, Mentors, Friends, and Families are welcome to attend

COVID-19 CV Guidance from the HMS Office for Faculty Affairs

The HMS Office for Faculty Affairs recognizes that previously scheduled presentations may be postponed or cancelled during the COVID-19 pandemic, and are providing guidance for how faculty should enter this information into their CV. Please append the following statements to local/regional/national/international presentations as appropriate:

This presentation was scheduled, but then postponed until [enter the year] because of a Covid-19 travel/meeting ban.

This presentation was scheduled, but then cancelled because of a Covid-19 travel/meeting ban.

Faculty do not need to amend live presentations that convert to video format due to Covid-19.

- Report of Local Teaching and Training
 - Formal Teaching of Peers (e.g. CME and other continuing education courses)
 - Local Invited Presentations
- Report of Regional, National and International Invited Teaching and Presentations

If you have questions regarding this CV revision, please reach out to OFA_Promotions@hms.harvard.edu

Please join the Office of Faculty Development as we welcome new faculty to Children's!
